CAPTOP® grip cap EP 211.

This is the new heat-resistant grip cap for the safe protection of pipe ends, hoses, shafts and bolts.

Heat-resistant and extremely flexible. We manufacture this EP 211 series from the material TPE. With TPE, we achieve a heat resistance of 150°C and also achieve a higher fit-flexibility.

Gentle and safe.

The grip cap fits a variety of thread types. It protects control, fine and pipe threads from contamination and damage during final assembly.

Quick removal.

The handy, reinforced handle allows for easy and quick removal of the cap from the application.

PROTEC PLASTICS

Flexible grip caps with an internal sealing lip

Heat-resistant · With ergonomically shaped grip tab
For threaded bolts, pipe ends, hoses
With a peripheral sealing lip for a tight fit

TRIPLE ADVANTAGE of PROTEC CAPTOP®

Quality. Technology. Grip caps made of TPE with a strap. Very flexible protective caps for cylindrical outer contours such as bolts, pipe ends and hoses. For threaded bolts, threaded pipes, shafts. With a peripheral sealing lip for a tight fit. Easy to use thanks to the ergonomically shaped central grip tab. With cylindrical shaft, easy to use for all cylindrical external contours such as pipe ends, hoses and bolts. The flexible material makes it possible to bridge larger tolerances.

Availability. With over 400 million moulded components in stock we provide the fastest on time delivery service to all markets and industries.

Protec Expertise. We provide the best Product, Price and Service Benefits.
